Mariam Mirzoyan

Profile

Front-end Developer with over 3 years of experience working with HTML, CSS, Javascript, React JS, and Git. Ready to work both in a team and independently.
In 2023, I completed the Meta Front-End Developer Professional Certificate course series provided by Coursera, during which I gained relevant experience in different areas of web development such as version control, UI/UX principles, testing, programming paradigms, etc. I used all this knowledge in various assessments and projects, including React websites considering real-world scenarios. I also participated in peer-graded assessments having a chance to see and evaluate other developers' works.
I am looking for an opportunity to work in a professional environment, gain more experience, master new tools, and implement them in real-world projects.

Experience
